**in the Classroom & Afterschool****2024 School Year****Dear Teacher:**

Now is the time to schedule STEM in the Classroom with 4-H. Register for one of the 2024 4-H STEM in the Classroom programs. Enclosed materials will help you learn about this year's offerings and how to register!

2024 4-H STEM in the Classroom & Afterschool Brochure - Describes each of the programs offered including academic concepts taught, materials provided and classroom enrichment value. In addition, schools will want to check out **Real Money, Real World** for students to learn money management skills **Clovers CODE** for students to learn graphic design and coding, and **STEM Pathways** for students to put the engineering design process and scientific method to the test on real-world challenges.

This year's enrollment fee is \$35.00 for participation in up to two different programs.

Payment is not required with registration. Please remit payment at least two weeks prior to scheduled program start date. Please scan the QR Code or go to

<https://go.osu.edu/2024clarkco4hintheclassroomregistration> to register now.

Classroom enrollment fees help defray cost of consumables as well as replace equipment, add new resources and programs. We conduct teacher and user trainings in connection with pick-up times for materials to maximize classroom success and minimize travel costs.

We look forward to working with your staff and students. Join us, and others, in **"Learnin by Doing" The 4-H  Way**. Your school can join the thousands of students and hundreds of teachers that have been experiencing 4-H in their classrooms. If you have questions or would like to schedule us to visit with you and/or other teachers at your school, please call or e-mail.

Sincerely,

Enclosures: 24 4-H STEM In the Classroom Brochure;

Patty House
Extension Educator
